Empowering Energy offers world-leading integrated technology solutions for private and public sector buildings

Whether your requirement is for small or huge convention center Empowering Energy can dovetail a solution that caters to any degree of customization of hardware software and aesthetics.

Overview/Company History

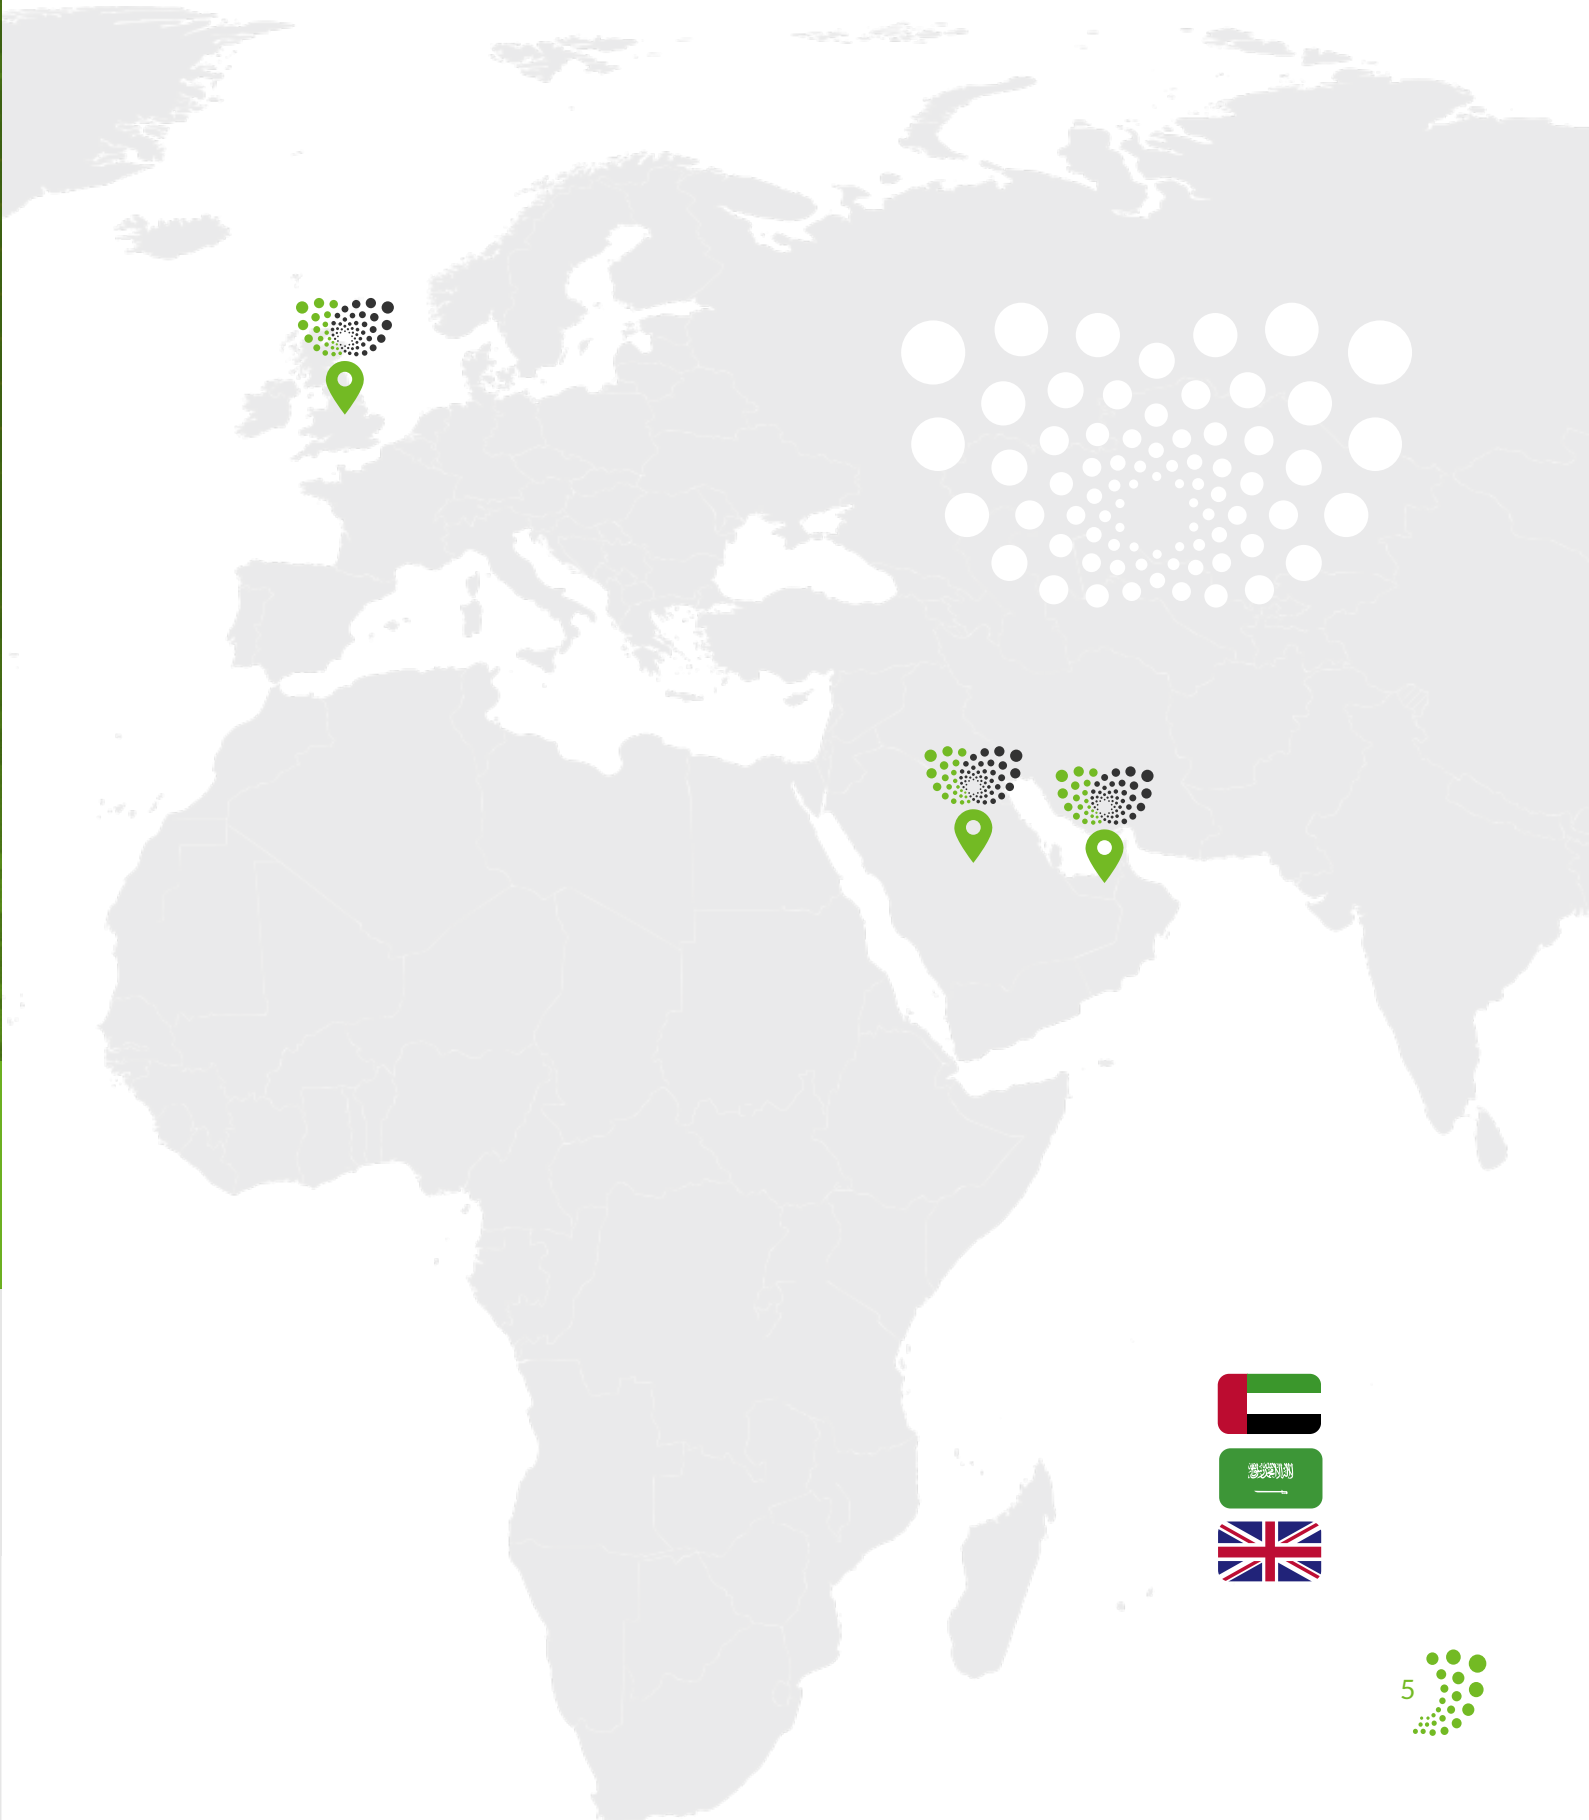

Established in Riyadh, Saudi Arabia, 1998 Empowering Energy is an innovative Smart Solutions provider and integrator for private and businesses in the Middle East. The company is engaged in the integration of building systems (LED Lighting, Automation, control & low current systems) in addition to the designs and consultations services on the same field.

Empowering Energy offers world-leading integrated technology solutions for private and public sector buildings. Also known as 'Smart Buildings', we are experts in the installation of advanced high-performance technical systems to automate tasks that would normally be carried out by people.

As experts in preparing businesses with cutting edge technologies, we provide professional consultation and implementation services in the virtualization and cloud migration of IT systems. Our goal is to automate operation management towards lower cost and reliable performance.

Empowering Energy designs and implements high resiliency data networks incorporating the latest technologies in wired and wireless communications. We provide internationally certified Data Centers, local and wide-area networks, network management systems and unified communications that span across the enterprise.

Empowering Energy Branches

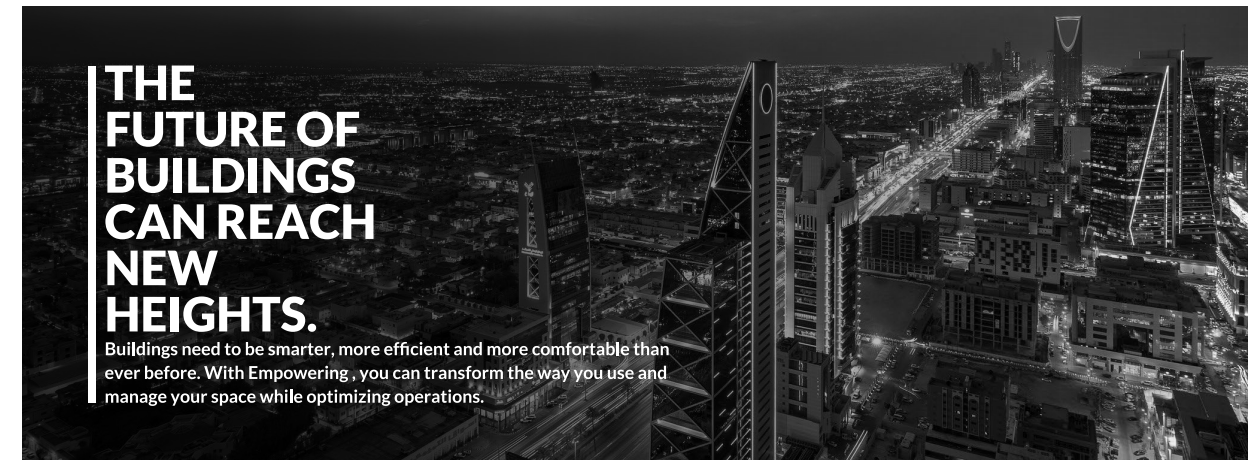

COMPANY MISSION

With the primary purpose of becoming a leading supplier of the highest quality intelligent building solutions available in addition to new enterprise IT technologies.

Empowering Energy is committed to supplying the best-branded systems to our clients, whilst delivering exemplary levels of customer service and technical support. From the outset, Empowering Energy adopts a personal approach to your project. From arranging a personal consultation to establish your exact needs, through to use our professional designers and expert engineers to create, install and

test your bespoke Smart Building system, we are focused to meet and exceed your expectations. As well as only using integrated solution systems from leading global manufacturers, our professional team of engineers will install and program the system safely with as little disruption to our client as possible.

Our intelligent energy management system and devices enable owners to monitor and reduce energy consumption of companies and home's electronics conserve resources, and save money. We allow the owners to track their property's energy consumption, in real-time, from practically anywhere.

In addition, our highly skilled Technical Support teams are always available to offer expert guidance on how to use your system and any follow-up service you may require. our strategic in the coming years will be, Focus on profitability and return on investments overgrowth through opening new business channels. Maintain a flexible organization and safe. Employ quality assurance in pursuit of service excellence. Practice sound financial management. Employ effective project management processes. Develop and training strong project management teams and support systems. To promote high ethical standards throughout our business, we have set out a range of policies and systems to help us manage our responsibilities.

We are committed to Providing quality and comprehensive, innovative solutions in Intelligent Automation and Control Systems coupled with technical expertise and applied to create total system Solutions in Commercial, Industrial and Home to our customers; Delivering innovations to help our customers in improving their business efficiency, reducing their operating costs, optimizing their energy usage, and ultimately, increasing their profitability.serving the welfare of the community at large through our strategies and actions in line with our commitment to sustainable development and energy savings built on economic progress, social development and environmental improvement

+40%

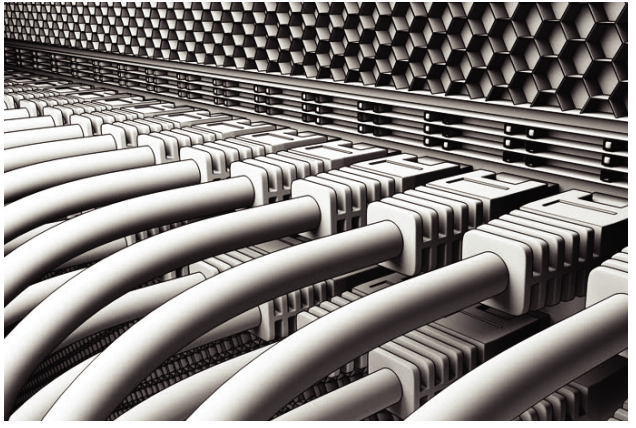

They started to change into digitalization

Developing digital strategies has become a core priority for countries in the region, as governments and enterprises face overwhelming challenges in adapting to our changing world. Increasingly, business models are driven by digital innovation,

DIGITAL
Transformation
to meet Saudi
Vision 2030.

OUR VISION

Empowering Energy is a Company primarily engaged in providing total automation solutions. We are committed to Providing quality and comprehensive, innovative solutions in Intelligent Automation and Control Systems coupled with technical expertise and applied to create total system Solutions in Commercial, Industrial and Public buildings to our customers; Delivering innovations to help our customers in improving their business efficiency, reducing their operating costs, optimizing their energy usage, and ultimately, increasing their profitability;

Empowering Energy place great importance on delivering a seamless service to our clients, which is only possible by having an expert team of professionally qualified programmers, designers, technicians and managers in place. As our most valuable resource, Empowering Energy believes in investing in training and development of our employees to enhance our workforce' existing skills and to prepare them for roles in the future. IT & Data Center

We provide internationally certified Data Centers, local and wide-area networks, network management systems

We supplied seats and seating for theaters. We have a wood technology centre where we work with all the wooden elements necessary. From traditional seats to the most modern designs.

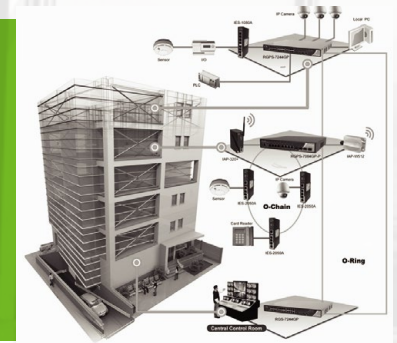

Our Integrated A/V Systems Division is recognized as a leader in the design and development of technology that helps our clients to manage, communicate and learn more effectively.

As leaders in the LED technology revolution, create lighting systems that prioritize energy efficiency, sustainability, and operational cost reduction. We focus on improving the livability and effectiveness of indoor and outdoor environments.

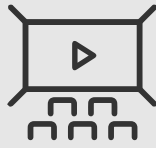

We have unique qualifications for full low current systems integration. We are expert Company in delivering all low current systems and integrating them across an IP network. Our projects include large government and corporate developments in highly secure environments.

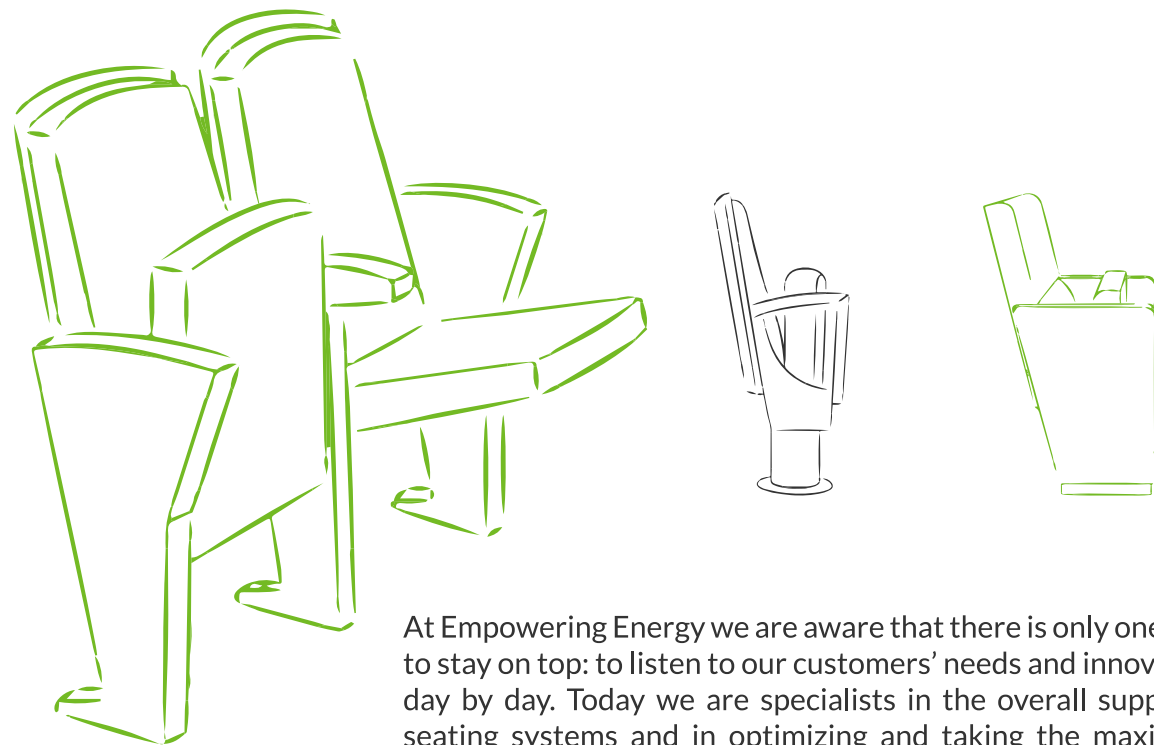

We developed the following:-
Network Design, Structured Cabling, Routed Networks
Wireless Networks, Data Center design and implementation

Theater & Meeting rooms

We supplied seats and seating for theaters. We have a wood technology centre where we work with all the wooden elements necessary. From traditional seats to the most modern designs.

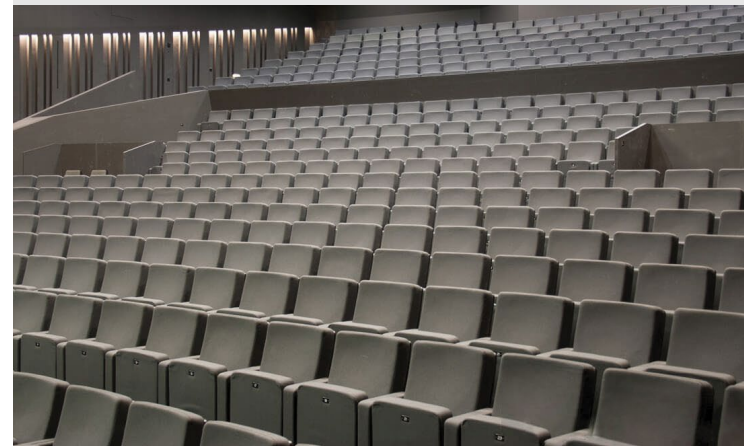

At Empowering Energy we are aware that there is only one way to stay on top: to listen to our customers' needs and innovating day by day. Today we are specialists in the overall supply of seating systems and in optimizing and taking the maximum advantage of space, also for schools and universities, although our greatest passion continues to be satisfying our customers

Theater Seating

All products meet and are certified to the most stringent international safety standards. This applies especially to products for use in schools and universities, which must ensure maximum safety for students and deliver proven durability in order to withstand intensive use.

Acoustic Panels

The acoustic panels, with different depths, absorb sound thanks to their thick layers of foam. They will definitely make sure that the sound waves in your room don't reflect back. Give your space the sound treatment it deserves.

Noise reduction

Silence is not a luxury

Acoustic Panels

Wall Panels

Equipped all meeting room with wall acoustic panels will enhance productivity, The variety of colors and shapes gave each room its own unique spin. The wall panels helped reduce the sound reverberation from sound bouncing off bare walls and improve the overall acoustic

Acoustic Panels

Wood Cladding Panel System

Acoustic slats according to customer requirements The well-thought-out system solution feels at home in high-quality interior design.

In addition to the effective acoustic elements, we also offer the exact appropriate substructure.

The panel system is our "all-inclusive package" for customers of all sizes. It contains not only panels in the ideal size, but also the matching substructure on request and is therefore as suitable for large wall designs as it is for the acoustic retrofitting of small rooms.

LIGHTING SOLUTIONS

OUR KEY ACCOUNT BUSINESSES

Find the right solutions for your projects

Are you looking for a full-service provider for your lighting project? As your professional lighting partner we can offer you a comprehensive range of application-specific products. We can help you reduce the costs of your lighting systems and at the same time improve the quality of light.

Our experts will support you in your lighting projects with advice matched to your needs, a tailored selection of products and excellent service. From a single source.

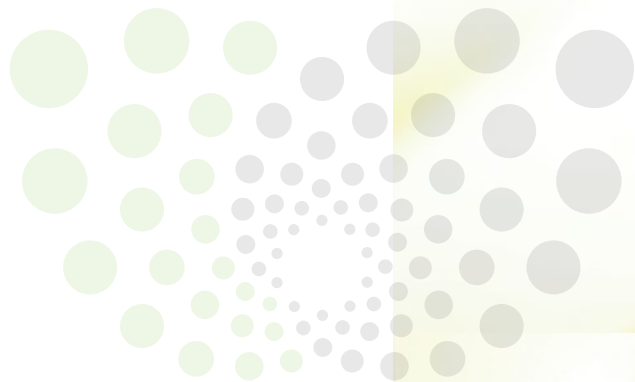

A global leader, we develop and deliver fully integrated, innovative, future-proof solutions designed for today and tomorrow—taking the connected buildings to new heights

IT & Data Center

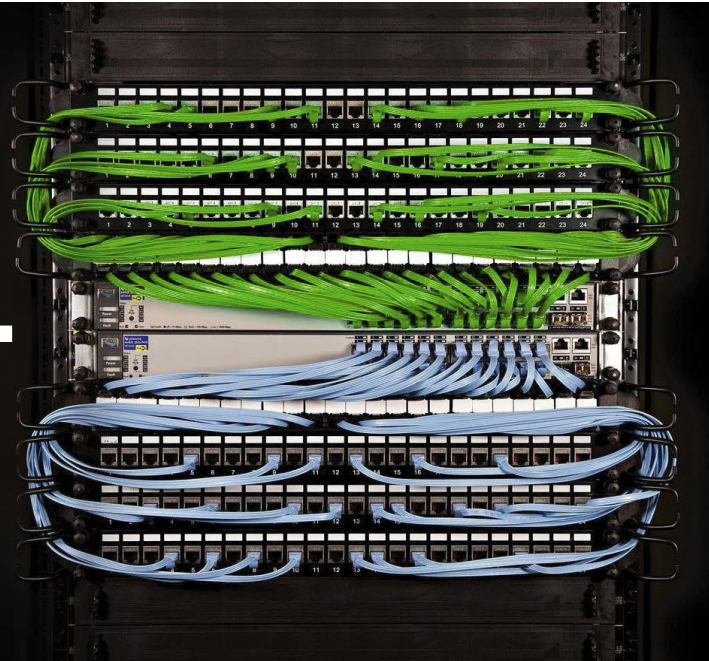

We provide internationally certified Data Centers, local and wide-area networks, network management systems

Fiber Optic

Empowering Enrgy engineers are experts on cable management, labeling, grouping and even supplying the right cable for the right application. We supply all kind of UTP cables, copper and fibre optics cables. Our engineers can help you install the cables, label them and organize into conduits.

The Cable Management HOW IMPORTANT IT IS?

As the datacenter grows in size and in the number of connected users and network/storage interfaces, the number of cables will increase as well. With the increase number of network, telephone, storage and power cables in the datacenter, it becomes a hard work to keep track of them if this wasn't done from the beginning.

All cables should be colour coded and managed through conduit through the ceiling or under the ground of the datacenter. You don't have to keep tracking the cable, you just read the label.

Our team will provide you with a schematic document so you don't even need to read the labels.

IT Services

Our Team will provide you full solutions to match your needs , Designing, installing and testing of access points, antennas, switches, routers etc.

We add values to our delivered projects to match latest technologies. On site services need to be managed and controlled to end up with satisfied client, engineers and technicians will make sure to deal with all tasks as high priority

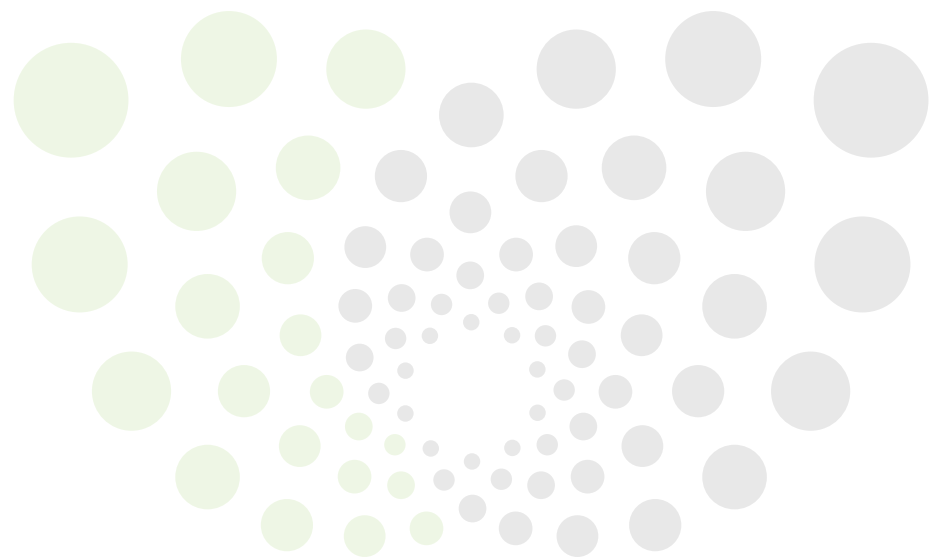

Electro Mechanical

To Design & Build superior quality and valuable turnkey projects that touch We deliver what we promise and we are reliable in our commitments. and engineering design to state of the art of Theaters As a leading Design-Build company in ME region with extensive knowledge.

- Lighting & Dimming Systems

By Lund Halsey is a well-established, successful company that manufactures professional furniture for control rooms, for use in industries such as aviation and broadcasting. It's a niche and complex market and in 2015, they identified serious potential risks from competitors that could jeopardise the business's success; firstly from high volume (affordable) furniture manufacturers who modify their products to compete on a professional level and secondly, from competitors offering more modern looking solutions, appropriate for 'high tech' working environments.

Moving beyond offering function alone, the focus shifted to delivering 'solid, cool, contemporary, quality' furniture and extending these values across the business. The final solution has a higher perceived value, based on a theme that associates the furniture with the sophisticated electronics and software that sits behind it

Hail University Theater

Just about everyone has to bring work home with them at some time, whether that be a stack of paperwork or saved on a laptop. Whatever your needs, the chances are that you need a home office - whether that looks like a complete room, a nook or a pull-out shelf, that's up to you. Here are one of modern office ideas to help you decide, and inspire the design of your study space decor.

A low partition wall makes this space feel like a separate room without cutting it off from the rest of the living area completely.

The architects, designers and consultants recommended Empowering as the only contractor capable of providing the right solution.

We helped the University achieve this by working alongside the architects, to design and manufacture bespoke units for the theaters. The units boasted our new 'silent' buttons as well as pluggable goosenecks,

The project was designed at the beginning of 2020 and we sent our top engineers to site to ensure that the full solution was fine tuned to produce the signature sound that is known so well from Empowering installations.
